

## Vehicle Thefts from Car Dealership Lots

Over the past 6 months, there have been consistent instances of vehicle thefts from car dealerships across the country. Dealership owners are losing tens of thousands of dollars in products and resources, along with valuable time because of it.

At 911Safetrack we want to help you secure your vehicles and your business's best interests. By installing an S4 tracking device on each of the vehicles on your lot, you are protecting your assets, offering your customers a valuable service, and increasing your profit margin on your vehicle sales.

The S4 vehicle tracking device alerts the owner the moment the car makes an unauthorized movement, or a factory installed vehicle alarm is activated. The alert, via text, will show you the GPS location of the vehicle, along with its speed, and the direction it is heading. You can then easily connect to a local 911 operator- no call center is used, saving you both time and money- to report the theft and get help immediately. Instead of falling victim to a ring of car thieves, be proactive and protect each of your vehicles with the S4. This way you are notified of foul play immediately, instead of getting a call from the police in the middle of the night letting you know that they found one of your vehicles abandoned.

Give us a call today at 877-427-7294, to learn more about the S4 Tracker and protect your dealership from financial harm.

Sincerely,

Chuck Roedel
